

Wastewater Treatment Services

For over 40 years, CES has provided professional engineering services to ensure dependable cost effective methods for the collection, conveyance and treatment of wastewater. Our experience ranges from upgrades and expansion of existing facilities through design of new wastewater treatment system. CES has also designed hundreds of miles of collection and conveyance systems throughout New Jersey and the greater Delaware Valley.

Responding to continuing escalating operating costs, CES is confident that we can provide cost effective practical solutions to your complex wastewater challenges ranging from treatability studies for small community systems to optimizing the wastewater treatment process at large regional facilities.

Past and present client list includes:
