

Whitesell Industrial Projects

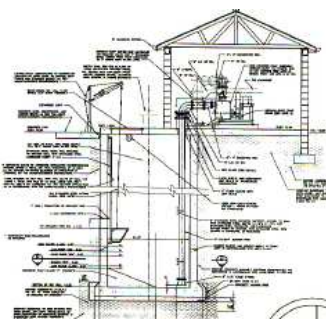

We are very proud of our long standing relationship with Whitesell Construction and the economic expansion they have brought to Southern New Jersey. Example projects include:

CTS Building - Burlington Township, NJ
Provided site planning/engineering for a 721,000 sf building that can be expanded to 1 million sf. Estimated at \$75 million by NJBIZ, this distribution warehouse has a 68 foot product storage height and 80 foot overall height making it the tallest warehouse/distribution building in NJ. The project was completed in 18 months and is located in Haines Center, a 900 acre industrial park owned and managed by Whitesell.

Burlington County Business Center, Lumberton Twp, Burlington County, NJ Located between the Mt Holly By-Pass and County Rt 641 (Chestnut Street), this Industrial – Flex Space facility has 169,000 sf. In contrast to the CTS building shown above, this project indicates the diversity of the Whitesell property portfolio that ranges from small offices to 1 million sf distribution warehouses.

Neck Road Pumping Station, Burlington Township Department of Public Works - Burlington County, New Jersey. CES worked closely with public officials on this project that included replacement of the outdated Neck Road pumping station to a suction lift pumping station that is rated at 400 gpm. The station serves the new Haines Industrial Park owned by Whitesell. This station included a duplex pumps located within a control building, controls, check valves and isolation valves and pig launching chamber. Outside of the building is an 8-foot diameter precast concrete wet well, and 80 linear feet of 8-inch DIP force main that will be tied into an existing force main.
